Washroom Design update – SPECIAL meeting

Patrick Graham MV Engineer reviewed options for new facility

- facility at bottom trail 6 to be replaced by 9 concrete feeding down into a large tank at beach level
- 13,000 litre tank to be replaced with a 60,000 litre
- geo-technical survey to be done
- to be pumped out once a year

Input

- squattie handholds for less-abled
- privacy screens
- pump out through potty hole would damage over time
- build up of methane issues
- vandalism is an issue to be
- to include urinal or not
- possible to put all of them on beach and get rid of the ledge site
- possibly move vendors bin and camouflage on south side of ledge
- Judy doesn't like this idea
- Chris full facility on north side is too far to walk
- good signage as to where facilities are
- Normand suggests half burying? Possible to partially bury and install a planted berm.
- Camouflage of vendor and facility

Jet Fuel facility - TABLED

Mini-condos

Judy read a letter from Craig to Richard re cutting into the cliffs. Richard responded saying people are starting to develop areas back up into the slope. Laurie suggested trail was already there.

All other items tabled

Next Meeting: May , 2010

Adjourned at – 7:02 p.m.
